

Introduction

What is Just Facts Academy?

Just Facts Academy is a free course where you learn how to research like a genius, ask the right questions, find genuine facts, and not get fooled by half-truths. The first step in this process is learning Just Facts' *Standards of Credibility*.

These include:

- Comprehensiveness
- Primary Sources
- Rigorous Documentation
- Raw Data
- Verification
- Clarity
- Balance

Who is it for?

Teachers, students, and anyone who wants to be informed.

Why is it important?

Information is easy to access, but it's not all reliable. Though some get fooled, most get overwhelmed and settle for the first few Google hits, their pet news source, or whatever *feels* right. But many issues have serious, even life-or-death consequences, and they're just too important not to research correctly.

REMEMBER: Einstein said that scientific greatness is less a matter of intelligence than character if you refuse to accept incomplete answers and persist in grappling with the most basic and difficult questions.
